GHRP2:

Energy and endurance increasing peptide

GHRP2 substantially stimulates the pituitary gland’s increased natural production of the body’s own endogenous human growth hormone (HGH). GHRP2 has shown on its own to robustly increase IGF-1 levels, and even greater results occurred when used with Growth Hormone Releasing Hormone (GHRH) to which also stimulates the pituitary gland to produce increased natural secretion of human growth hormone. This also boosts the hypothalamus function as well.

**Benefits:**
- Increases energy and vitality
- Increases endurance
- Accelerates healing from wounds
- Strengthens the heart
- Reduces fat through lipolysis
- Enhances the immune system
- Stimulation of hypothalamus
- Increases IGF-1 production, by as much as 50% in first week
- Increases calcium retention, strengthens and increases the mineralization of bone, bone density
- Increases protein synthesis

**Sequence:** H-D-Ala-D-2-Nal-Ala-Trp-D-Phe-Lys-NH2

**Molecular Formula:** C42H50N8O5

**Molecular Weight:** 749.9

**CAS No.:** 87616-84-0
